

# RIG.800

- Automatic folding machine with digital technology, for paper sheets 92 cm wide (36") and unlimited length, in 3 meters multiple-sections.
- Folds any type of drawings, also ink-jet, with a high quality that was not possible before on similar machines with limited price.
- Working with no any noise, it may be installed anywhere in your offices, thanks also to the very limited dimensions 117 x 71 cm.
- The possibility to rotate the feeding table when not in use, will reduce any more the depth to only 50 cm.
- Digital technology offers a wide range of folding options at truly impressive speed, 7 A0 formats per minute.
- Multi-programmable, with or without Filing margin 20 mm, and with Fold width adjustable 175-215 mm in 1 mm steps.
- Automatic measurement of the length of any drawing during folding.
- Modular construction for installation on your table or with strong stand.
